PROFESSIONAL SUMMARY

Junior Software Developer with hands-on experience in PHP, JavaScript, and Microsoft SQL Server, delivering real-time production dashboards, Kanban systems, and barcode-based inventory solutions. Strong backend expertise in REST APIs, authentication, and relational database design, with frontend experience in HTML5, CSS3, JavaScript, and React.js. Proficient in Git-based version control and collaborative development. Seeking to grow into an Associate Software Engineer role.

TECHNICAL SKILLS

- **Programming Languages:** Java, PHP, JavaScript, Python; strong understanding of **OOP**.
- **Frontend Technologies:** HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Bootstrap.
- **Databases & Backend:** MySQL, Microsoft SQL Server, MongoDB; Node.js, PHP backend development, authentication, backend architecture, and database design.
- **Tools & Dev Practices:** Git, Postman experience with version control, API testing.

WORK EXPERIENCE

Junior Software Developer

2024 Dec - Present

SUN-TWS TVS Group

- **Designed and delivered** a production-ready **Live Production Dashboard** to monitor hourly production targets vs. actual output using HTML, CSS, JavaScript, PHP, and Microsoft SQL Server.
- **Designed and delivered** a real-time **Kanban System** to track WIP, display next production timings, and highlight ongoing or delayed machine statuses with delay reasons.
- **Developed** a barcode-based **Scanning System for Finished Goods Store (FGS)** to streamline inventory tracking and ensure real-time production data storage in Microsoft SQL Server.
- **Implemented a Product Matching System** to validate correct materials before production through scan-based verification, preventing material mismatches and production errors.
- **Handled** API integrations, database schema updates, bug fixes, and code refactoring, while actively using **Git** for branching, commits, and merges.

PROJECTS

SLPL Auctioning Website— University Final Year Project | **PHP, HTML5, CSS3, JS, MySQL**, Full Stack

- Contributed to **full-stack development** for a team of 8, building a platform where users can **register, view dashboards, register for auctions, and track auction history**.
- Developed **backend, database design, and frontend dashboards**, including **teams, player registration features**.
- Collaborated with team members to deliver the system, integrating all components with maintainable code.

E-Commerce Platform — Personal Project | **React.js, Node.js, MongoDB**

- Built a backend system with **full authentication, product management, cart, and order processing**, implementing Node.js.
- Designed APIs independently for key functionalities, including **price calculations and order workflows**.
- Applied knowledge gained from this project to later build the **Leave Management System**, demonstrating **transferable backend design skills**.

E-Commerce Platform (Clothing Store) – Personal Project | HTML5, CSS3, JavaScript

- Designed and delivered a responsive **online shopping website** to showcase clothing items with interactive product displays and user-friendly navigation.

Travel Booking Website – Personal Project | HTML5, CSS3, JavaScript

Developed a travel company website to **showcase tourist destinations** and enable **vehicle booking functionality** with an intuitive user interface.

EDUCATION

University of Ruhuna - Bachelor of Science

2020 - 2023

- Relevant coursework: **Applied Mathematics, Mathematics, Computer Science.**
- Strong foundation in **analytical thinking, problem-solving, and computational concepts.**

Mahinda College Galle

2002 - 2017

- GCE Advanced Level – Science Stream - 2018.
- GCE Ordinary Level - 2013

PERSONAL SKILLS

- **Problem-Solving & Analytical Thinking:** Able to analyze complex problems and design efficient backend solutions, reinforced through projects and practical coding experience.
- **Teamwork & Collaboration:** Experienced in cross-functional teams, mentoring students, and coordinating with peers on development projects; enhanced by competitive university-level football experience.
- **Time Management & Discipline:** **Balanced professional development, personal projects, and academics.**

PERSONAL SKILLS

- **Majintha Crishan**
Senior Software Engineer
Axiata Digital Labs
076 137 6444
- **Niranjan Senevirathne**
Vice President
SUN-TWS
077 772 6392
